

ADM-6.2

OEL-996/64

12 OCT 1964

MEMORANDUM FOR: Director of Logistics

SUBJECT : Extension of Base Contract [] 25X1
 Task Order 46 to Include Phase III

REFERENCE : A. Phase I - OEL-315/63 dated 19 April 1963
 B. Phase II - OEL-191/64 dated 28 February 1964

25X1

1. The Assistant Director for KLINT engaged [] 25X1 as a contractor for the development of a [] Phase I of this contract, negotiated in FY-63, provided for a feasibility study and the breadboarding of the analog digital converter subsystem and was completed to the satisfaction of OEL engineering personnel. Phase II of the contract provided for the development of the buffer memory subsystem. This phase of the contract was consummated during September 1964 to the satisfaction of OEL engineering personnel. The present effort, Phase III, relates specifically to [] 25X1 [] as integral part of the collection system.

25X1

2. The original requirement for a [] 25X1 was levied upon the Assistant Director for KLINT by the SR Division. Representatives of this division have monitored the progress of the contract and have coordinated and conferred in the initiation of each of the three phases. Phase III is needed in connection with operational requirements in early 1965, thereby justifying negotiation of Phase III of the contract.

3. The technical proposal does not clearly define milestones to be accomplished by the contractor in connection with contract execution. Representations have been made to [] to establish milestones and concurrently to key anticipated expenditure rates to these milestones to insure that execution progresses in accordance with scheduled activity. This information is to be made available to the Office of Logistics and representatives of OEL on or about 16 October 1964. Since Phase II of the contract expires on 15 Oct.
